

Ubuvuzi bwa COVID-19 bukoresha Monoclonal Antibody (abasirikare b'uturemangingo tw'ubwoko bumwe)

Ni iki? Ubuvuzi bukoresha Monoclonal antibody (abasirikare b'uturemangingo tw'ubwoko bumwe) bufasha kurinda umuntu kurwara akaremba n'urupfu. Inkingo ziracyari uburyo bwiza kurusha ubundi bwo kwirinda cyangwa kugabanya cyane uburwayi butewe n'ubwandu bwa COVID-19, ariko ubuvuzi bukoresha mAb bushobora gufasha iyo umuntu aherutse gusuzumwa bagasanga arwaye COVID-19.

Ese bwamfasha? Ubu buvuzi bwahariwe abantu buzagirira akamaro cyane kurusha abandi. Ushobora kwemererwa kuvurishwa Monoclonal Antibody niba ikizami cyaragaragaje ko wanduye COVID-19, ukaba ufile ibyago byinshi byo kuremba, urengeje imyaka 12, **kandi hakaba hashize iminsi 10 cyangwa itagezeho ugaragaje ibimenyetso**. Sura coronavirus.utah.gov/noveltherapeutics maze ukande **Risk Score Calculator (Igipimo cy'ingano y'ibyago)** kugira ngo urebe niba ubu buvuzi bushobora kugufasha.

Nabuhabwa ryari? Ubu buvuzi bugira akamaro kanini iyo butanzwe kare, kandi biba byiza cyane iyo butanzwe kare. Bugomba gutangwa mu minsi 10 uhoreye igehe ibimenyetso by'indwara byatangiriye kugaragara. **Menya ibyago ufile mbere y'uko urwara COVID-19, koresha Risk Score Calculator (Igipimo cy'ingano y'ibyago) kugira ngo urebe ko ubu buvuzi bwagufasha (kiboneka kuri coronavirus.utah.gov/noveltherapeutics)** maze uhite wipimisha COVID-19. Niba ikizami kigaragaje ko wanduye COVID-19, kora igikwiye bwangu.

Butangwa gute? Akensi uhabwa imiti inyujijwe muri serumu, cyangwa utewe urushinge ku kuboko. Guhabwa ubuvuzi bifata hafi amasaha abiri. Abaganga bemewe, babyigiye ni bo bonyine bashobora gutanga ubu buvuzi.

Burizewe? Yego. Imiti ya mAb yemejwe n'ikigo cya leta gishinzwe imiti n'itangwa ryayo (FDA) n'uburenganzira bwo gukoreshwa mu gihe cy'ubatabazi (EUA), kandi amagerageza yo muri laboratwari yagaragaje ko yizewe, ikora neza. Ingaruka zayo zrimo: ububabare, kuva amaraso cyangwa guhisha ahatewe urushige ku kuboko, iseseme/impiswi, kurwara umutwe, isereri cyangwa uburyaryate ku ruhu.

Nabukura he? Hanze y'amavuriro menshi atanga ubuvuzi bukoresha mAb (ashobora gusaba amafaranga), hari ahantu hane hagengwa na leta cyangwa abafatanyabikorwa ushobora guherwa ubu buvuzi ku buntu. Aha hantu haherereye mu Ntara ya Davis, Murray, Orem na St. George. Ahakorerwa iby'ubuzima ha University of Utah Health and Intermountain Healthcare (Kaminuza ya Utah na Intermountain Healthcare) na ho ntibaca abarwayi amafaranga. Ku buvuzi bw'abana bafite imyaka 12 kugera kuri 15, ohereza imeyili kuri Pediatric.MonoclonalAntibodies@imail.org.
